

Geami WrapPak[®] HV

Perfect presentation

Geami WrapPak is a combination of punched kraft paper with tissue paper. The Geami WrapPak HV converter expands the punched paper into a 3D honeycomb structure creating a unique packaging product.

By locking the inclined cells to one another, the elements are packed tightly without need for a tape. The machine can be used in any packing station where individual articles need surface protection.

				
72 x 51 x h44 cm	31 kg	NO	100-240 Volt	320 W

Geami WrapPak HV is an ideal system to pack a large number of objects. It is an electronically driven converter, and you can greatly improve speed and productivity of your packaging area.

This solution is ideal, for example, in e-commerce where the main purpose is to optimize packaging volume while offering customers a pleasant unpacking experience.

	Code	Length of roll	Weight of roll	Rolls per pallet
WrapPak® Geami Paper 250m	710023	250 m	11 kg	40
WrapPak® Geami Paper 250m white	710024			
WrapPak® Geami Interleaf 840m white	710025	840 m	6 kg	

 **Go green**

All Ranpak papers come from FSC certified suppliers. The paper is safe for the environment and climate. It is also recyclable and comes from renewable sources.
