

PadPak® LC2

The high-speed solution for light protection and complete filling

PadPak® LC is the fastest solution available on the market to create padding with paper cushions. The high efficiency allows for a high production of packaging.

The converter turns single-layer paper into cushions that protect packed items during transport.

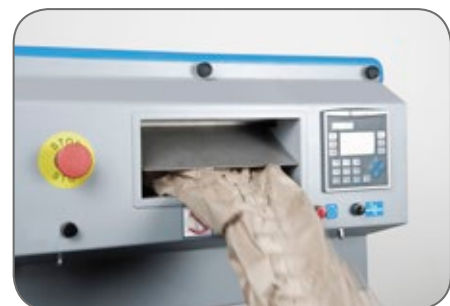

Folding paper packs with adhesive bands ensure easy loading on the machine and high-speed operation. The paper pad can be used to protect, block and wrap any type of product.
